

5 FACTS ABOUT GPRA FOLLOW UP

Who is eligible for a GPRA follow up survey?

EVERYONE!

Any client (age 16-21) who received MYTIE services including a GPRA intake survey is eligible for a follow up survey.

Does treatment status effect GPRA surveying?

NO!

Treatment status does not effect GPRA eligibility in any way. If a client has a GPRA intake completed, they are eligible to complete follow up surveying.

When should follow up surveying be completed?

Based on the date of intake recorded on the GPRA intake survey, follow up surveying must be completed between 5-8 months following the date of intake.

Ex: Intake January 1st
Follow up window: June 1st-
September 1st

What to do when a follow up window is closed?

If follow up surveying is not completed within the follow up window, the clinician will need to submit an administrative follow up survey.

This will count negatively against your agencies follow up rate which should be 80% compliance.

GPRA Completion Incentive

Don't forget, if a client completes all 3 requirements (intake/discharge/follow up) of GPRA surveying they are eligible for the \$30 Amazon gift card. Treatment status does not effect gift card incentive eligibility.
